

115i Enclosure

OVERVIEW

Peavey 115i enclosures are extremely affordable two-way speaker cabinets with a single heavy-duty woofer. These trapezoidal enclosures are capable of handling 400 watts program and 800 watts of peak power. Working pros will appreciate the built-in tweeter protection, heavy-duty crossover and molded-in pole mounts. Features include a premium woofer with 2 3/8" voice coil, an RX14™ compression driver with a 1.4" titanium diaphragm, 1" exit through a constant directivity horn and heavy-duty metal grille.
