

MAX® 115

OVERVIEW

The MAX® 115 bass combo amp delivers more bass in a space saving package. With 300 Watts of power that includes DDT™ speaker protection and a 15 inch heavy-duty woofer, the Peavey MAX® 115 is ready for plenty of gigs and rehearsals. Another Peavey exclusive is the patented TransTube® circuitry that offers you a gain boost feature that automatically turns off the tweeter for a more authentic classic overdrive sound. The EQ section includes a 3 band EQ and buttons for Punch, Mid-shift and Bright. The Max 115 also includes a unique psycho-acoustic low end enhancement that adds low end without taxing the speaker, a testament to Peavey's technology driven philosophy. Rounding out the features are a built-in chromatic tuner, XLR direct output with ground lift and 1/8" jacks for phones output and aux input.
