

PV 2015 Enclosure

OVERVIEW

The PV® 2015 is a full range quasi-three-way speaker system utilizing a pair of 15" premium woofers and a RX14™ titanium diaphragm dynamic compression driver for the highs. This high performance driver is mounted on a Peavey® asymmetric Quadratic Throat Waveguide™, with smooth, even response, low distortion and good high frequency dispersion. This horn has an asymmetrical vertical polar response, aiming the main energy lobe down 10°, so it is aimed at the audience, instead of over their heads. This helps reduce ceiling reflections for greater clarity and gain before feedback. The constant directivity characteristics provide the even coverage needed for a successful sound reinforcement application. The lightweight, yet rugged, carpet-covered trapezoidal enclosure is ideal for portable use for live music or speech sound reinforcement, as well as music playback. A full-length, black powder coated perforated steel grille provides driver protection, and a professional appearance. The crossover network includes tweeter protection, and driver EQ, for clear punchy sound, and good long term reliability. Two 1/4" phone jacks are connected in parallel for flexible wiring options.
