

# SC™ 2 Black

## OVERVIEW

The SC-2 features humbucking pickups, alnico loaded for warmth, punch and presence, harmonically positioned and frequency calibrated. The SC-2 is an elegant two-pickup guitar. All Single Cut guitars feature treble-compensated volume controls that enhance pickup clarity at low volume levels. The SC-2 is crafted from basswood with an integral center body section, carved top and a deep lower cutaway with scoop for extended access to the upper register. The SC-2 features an "Extended Tail Section" meaning that the neck pocket is extended all the way to the pickup cavity, vastly increasing the amount of contact area of the neck to the integral center body section of the body. This has the effect of increasing the sustain of the guitar and is a feature not seen on guitars costing many times as much as the SC-2. The SC-2 features a hard rock maple neck with rosewood fingerboard. The SC-2 boasts gloss black, cherry burst and vintage tobacco burst finishes, with chrome hardware and standard dot inlays, and uses die-cast tuners with a 15:1 gear ratio.

## FEATURES

- 24.75" scale
- Three- a-side, diecast tuners, keystone buttons, 15-1 Ratio
- 1.69" nut width
- 2 volume and 2 tone controls
