

Versarray™ 124 Sub

OVERVIEW

The Versarray™ 124 Sub incorporates the new Peavey® high power The Beast™ 24" diameter subwoofer driver and a new compact cabinet design.

The Versarray™ 124 Sub is a direct radiator vented subwoofer designed specifically for the most demanding Pro-Audio user. The Beast™ subwoofer driver in the Versarray™ 124 cabinet is Peavey's pinnacle of large-diameter subwoofer design. An outstanding 2,200 Watt program rating and extra-long cone excursion add up to amazing levels of clean, deep bass from a single 24" woofer. Incorporating a 5 inch diameter voice coil with dual spiders and long-throw construction designed in from the start, this reliable deep bass subwoofer driver goes down low and loud. This makes the Versarray™ 124 Sub a superior choice for the bottom end of any high performance sound system, primarily designed for professional touring and high performance permanent install.
