

Vypyr® VIP 3

OVERVIEW

Once again Peavey Electronics revolutionizes the modeling amp industry. Introducing the world's first Variable Instrument Performance amplifier, the VYPYR® V.I.P. The world's first amp that contains Bass guitar, Acoustic guitar and Electric guitar amplifier models. Now for the first time ever using our Variable Instrument Input a single amp can provide amplification for a variety of instrument types. Not only does the amplifier morph from a bass amp to an acoustic amp, to an electric amp. It also, for the first time ever in an amplifier in this category, allows the electric guitar player access to instrument models as well. Using appropriate technology, Peavey uses a combination of powerful 32-bit, floating point SHARC processors and patented Transtube® analog circuitry to create the best sounding modeling amplifiers available. Nothing sounds as good as a VYPYR. All VYPYR effects, amp models and parameter controls can be accessed via the amp itself, with no need to hook the amplifier to a computer. Peavey's WYSIWYG control surface quickly allows the user the ability to see and adjust the control position, no guessing where the control is supposed to be, or having to manually move it to where it should be preset to preset. VYPYR's new USB bi-directional data and audio port provides an easy way to record, and or connect to our VYPYR software and store presets, get lessons, and practice to backing tracks while connected to your computer. All of the revolutionary features from the original VYPYR series now even better. More power, more effects, more amp models, Variable Instrument Input, instrument models, and more make this the ultimate amplifier.

FEATURES

- 100 Watts
- One 12" Custom voiced modeling speaker
- Patented TransTube® technology
- PowerSponge 100 Watt to 1 Watt variable power
- Acoustically ported semiclosed back
- Over 400 amp accessible presets
- LCD Display for quick preset, model and effect selection
- 10 instrument models including Acoustic guitar simulators, 12 String guitar model, Sitar model, 7 String model, Baritone Model, Resonator model, Electric Violin, Bass guitar models
- Enhanced chromatic tuner
- 12 Amp accessible stompbox models plus delay reverb and wah (with optional Sanpera)
- 36 on board amp models

- 6 bass amp models
- WYSIWYG (what you see is what you get) controls
- On-board looper (with optional Sanpera I or II)
- Amp accessible real time dual parameter controls
- Amp accessible global reverb and delay
- 26 Total on-board amp accessible effects.
- Tap Tempo
- Bi-directional USB - Data - Midi - Audio record out
- Studio quality headphone out
- Aux/MP3/CD input
- Up to 5 effects simultaneously (with optional Sanpera™ I or II)
- 6 acoustic amp models
- Weight Packed: 29.39 lb(13.329 kg)
- Width Packed: 20.75"(52.705 cm)
- Height Packed: 21.5"(54.61 cm)
- Depth Packed: 11.5"(29.21 cm)
